ankutsan

Ankutsan, which operates in the corrugated cardboard sector and was established in 2002 with 100% domestic capital, operates with 5 production facilities on a total area of 239,000 m². Ankutsan, one of the leading manufacturers in Türkiye, produces 300 thousand tons of Paper, 420 thousand tons of Corrugated Cardboard Sheets and Boxes annually. With more than 2,000 employees and the title of being the first R&D Center in the sector, it leads innovation and development. With its dynamic structure, sustainable quality understanding and innovative mission, it offers qualified solutions for the box needs of all sectors. Our innovative teams produce the most suitable boxes for our customers' product ranges with techniques including special printing services. Ankutsan, which ranks among Türkiye 500 largest industrial enterprises every year, is the fastest growing company in the corrugated cardboard industry with its facilities established with the Industry 4.0 approach and advanced technology integrated production methods all over our country.

PRODUCTION FACILITIES

ANTALYA
PRODUCTION FACILITY

- **Area (m²):** 32.000 m²
- **Year of Establishment:** 2002

- The first and only line in Türkiye designed in a configuration suitable for qualified paper processes
- Türkiye highest capacity and most efficient facility in the production of fresh fruit and vegetable boxes

MERSIN
PRODUCTION FACILITY

- **Area (m²):** 34.000 m²
- **Year of Establishment:** 2014

- The factory has the most comprehensive, advanced and highly automated technology in the region and is advantageously located close to
- Mersin Port, Türkiye largest and most trafficked port

TEKIRDAG
PRODUCTION FACILITY

- **Area (m²):** 32.000 m²
- **Year of Establishment:** 2020

- Automation systems with Industry 4.0 technology
- Advantageous position in exports with proximity to Türkiye 2nd and 3rd ports

ankutsan

ANKARA
PRODUCTION FACILITY

Area (m²): 38.000 m²

Year of Establishment: 2016

- Ankutsan semi-finished product production center
- Industry 4.0 technology and high performance
- Unmanned production and automation applications

ADANA
PAPER PRODUCTION PLANT

Area (m²): 238.000 m²

Year of Establishment: 2018 (PM1), 2023 (PM2)

- 80 – 270 gr range Kraftliner, Imitation Kraft, Imitation Kraft, Fluting, HP Fluting and Testliner paper production
- FSC (FSC-C145645) Forest Management
- System in accordance with the principles of reliable and sustainable forest management

ADANA
RECYCLING PLANT

Area (m²): 8.000 m²

Year of Establishment: 2022

- Packaging and non-hazardous paper converting center
- Sorting and bale/press processing

SUSTAINABILITY

Ankutsan has built its sustainability approach on the values of honesty, reliability, innovation, business ethics and social responsibility. It is committed to protecting the human rights of its employees, prioritizing occupational health and safety, supporting their professional development and providing fair opportunities. It resolutely fights against practices such as discrimination, child labor and forced labor. Ankutsan expects its suppliers and business partners to comply with similar norms and follows these processes meticulously.

SUSTAINABILITY GOALS

Protection of Employee Rights

Protecting the rights of our employees and prioritizing occupational health and safety.

Fair and Equal Opportunities

Providing fair and equal opportunities to our employees and supporting their professional development

Combating Discrimination

To prevent all forms of discrimination, child labor and forced labor.

Sustainable Supply Chain

To ensure that our Sustainable Supply Chain Suppliers also comply with sustainable working norms and to monitor these practices.

Global Sustainability

Adapting to policies and strategies based on developing global and sustainable social responsibility awareness.

Renewable Energy Use

To meet energy needs from environmentally friendly sources and reduce carbon footprint through biomass, wind energy (WPP), and solar energy (BES) investments.

Ankutsan continues its mission to leave a more livable world by putting sustainability at the center of its business culture.

ankutsan

Ankutsan has been carrying out its R&D activities since 2016 and received the R&D Center approval certificate from the Ministry of Science, Industry and Technology in 2017. This center, the first of its kind in its sector, was established to develop innovative products and meet the needs of the market with scientific methods, and continues to work with its young and competent staff.

Ankutsan offers innovative solutions in product development and production processes, while integrating academic knowledge and technology into the sector through collaborations with universities. Many of its projects have been awarded in internationally prestigious competitions in the packaging industry, certifying its innovation and competence. Thanks to its design competence, successful projects have been realized by collaborating with many solution partners in different sectors for packaging with special needs. In addition, it contributes to the dissemination of knowledge by sharing the information obtained in the R&D Center and encourages its employees to participate in master's and doctoral programs.

FRESH VEGETABLE FRUIT & SEEDLINGS

Maintaining the freshness and quality of fresh fruits and vegetables is critical during the production and logistics stages. Scientific studies have proven that corrugated cardboard boxes extend the shelf life of products by absorbing microorganisms with their porous structure. Ankutsan corrugated cardboard boxes help you protect your products in the best way at every stage in the supply chain. Our boxes allow you to transport your products safely with their durability, flexible design options and environmentally friendly structure.

CORRUGATED BOARD AND PAPER

Ankutsan is a leading brand that combines superior quality with sustainability in corrugated board and paper products. Our production processes are optimized with the latest technologies to provide our customers with high-performance, environmentally friendly solutions. Our paper and corrugated board is designed to suit a variety of applications in different industries. We fulfill our responsibility to the environment by using FSC® (FSC-C145645) certified raw materials within the framework of sustainability principles.

- Superior durability and performance for different industrial needs
- Superior supply and planning advantage with high capacity paper and box integration
- FSC® certified, recyclable raw material
- Innovative and sustainable production processes that minimize environmental impacts
- Compliance with high standards through strict quality control processes
- Integration of advanced technology and Industry 4.0 in production processes

Ankutsan manufactures cardboards specific to the needs of its business partners by determining the combination of different paper types, wave types, single wave and doppel options.

DIGITAL PRINTING

As Ankutsan, we offer digital printing services using the latest technologies in corrugated cardboard production. Thanks to our high-tech digital printing machine, we offer our business partners high-quality and customizable printing solutions. Innovative printing technology allows us to produce high volumes in a short time, while also supporting an environmentally friendly approach. We offer solutions at the highest level for both large-scale production and special design needs.

Specifications:

- Clear and vivid printing with high resolution that supports brand and product identity
- Ability to print large volumes with fast processing power
- Digital printing technology that offers environmentally friendly solution with minimum waste
- Production flexibility to accommodate different sizes, shapes and order volumes
- Fast and economical prototyping capability
- Durable, long-lasting print resistant to external factors
